

General description:

EA manages all or only new trades adding SL/TP. Work for all trades on account or only chosen pair.

Parameters

- activeForNewTradesOnly (true/false) – choice which trades will be managed: if true only trades opened after activation of the tool will be modified; if false – work for all trades also already opened
- activeForAllPairs (true/false) – choice which pairs will be managed: if true work for whole account – all pairs; if false – work only on current instrument (on which EA is applied)
- stopLoss value of Stop Loss of the trades in points
- takeProfit value of Take Profit of the trades in points
